

THE
KINGFISHER
RIVERSIDE PUB & ROOMS

SUSTAINABILITY POLICY

At The Kingfisher we are committed to reducing our carbon footprint. We strive to be an environmentally responsible venue to help achieve a cleaner, safer and healthier world for us and for future generations, reducing our impact on the planet whilst delivering the best customer experience. Our plan is to educate and improve understanding in order to become more energy efficient, reduce waste, minimise pollution, recycle and to fully integrate environmental best practices into our day to day operations.

We understand the importance of acting now to help improve our environment. We are working tirelessly to ensure our commitments are met and are aware that the activities of our venue have the potential for negative impact on our local habitat and its community, so we are striving to make the changes to our policies and procedures to minimise this and commit to continually reviewing these.

Education and understanding is key, so we will work with our team, suppliers, partners and guests to reduce the environmental impact and risk to our business by focusing on critical areas including carbon emissions from energy, waste, water, food & supply chain. These environmental performance indicators will be measured and summarised through annual reporting and used to continually improve our sustainability journey.

The Kingfisher are proud to have achieved the ECOsmart 2025 Gold Award
